# $CO_2$ -PRODUCT INFORMATION

The production of our bags causes emissions that we cannot completely avoid through optimization measures. For these unavoidable emissions relating to our stock program, we make a financial contribution to climate protection and in this way support climate protection projects, especially in the countries where our products are manufactured. This means that these emissions are already offset when you purchase a HALFAR® bag from our stock range from our warehouse in Bielefeld. You can read more about offsetting unavoidable product emissions here.

| Article number | 1815014 |  |
| Article name | shopper EARTH | |
| Customs tariff number | 42029298900 | |
| Country of origin | IN | |
| Main material | Cotton | |
| Item weight in g | 62 | |
| $CO_2$ -Emissions per unit in kg | 2,43 | |
| Values calculated by Climate Partner on the basis of the „Greenhouse Gas Protocol Product Life Cycle Accounting and Reporting Standard "(GHG Protocol) | | |

System boundaries and methodology for determining $CO_2$ values. The values were calculated using the cradle-to-customer plus end-of-life approach. The product emissions stated here are based on the company's $CO_2$ balance for the year 2024, with product-related emission categories allocated to this product on a pro rata basis. The calculation therefore represents an average footprint based on the year 2024 and covers the following life cycle phases of our articles:

- the extraction of raw materials and packaging,
- the corresponding logistics processes,
- the manufacture of the product,
- the corresponding disposal emissions of the product and packaging

If you have any further questions, please do not hesitate to contact us.
